

## PE-DESIGN 11

We have packed this software with so many time-saving features that will help you create more in less time. Imagine the capability to create your own fonts, stitches and designs - just once - to use many times on hats, pillows, shirts, and other fabrics. Reduce the amount of time spent changing threads by using the Intelligent Color Sort feature, which will stitch those areas that share one color in groups.

### Create and Be Creative

Let your imagination soar with the ability to create your own decorative sewing stitches up to 100mm wide\* by using the Stitch Design Factory and create your own fonts with the Font Mapping Tool that will let you use them later as built-in lettering.

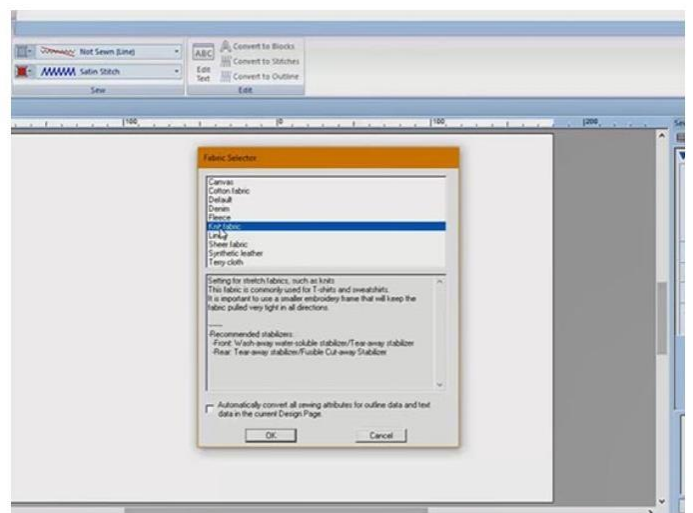

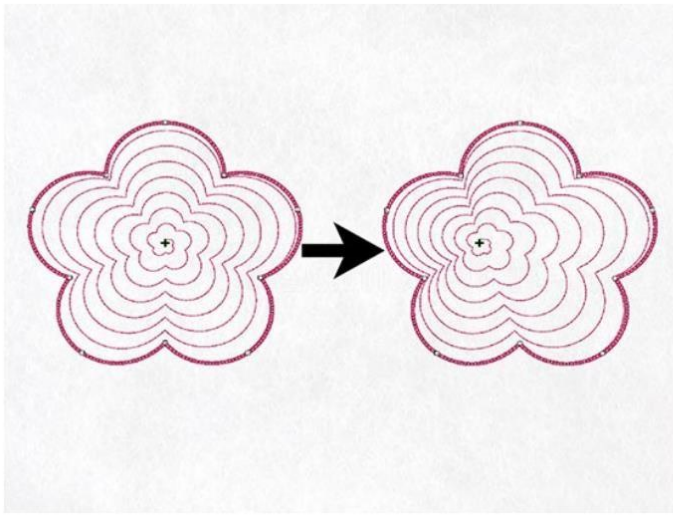

### Save Time Searching

Having the ability to choose your own built-in fonts and designs in less time will help you start your projects sooner. Using the font filter will help you narrow down your choices from the 130 fonts built into PE-DESIGN 11. Choosing from over 1,000 built-in designs is now easier with the design preview that lets you see your choice before you stitch.

### Power in Automation

How much time do you spend trying to figure out what type of stitch you need for your fabric or the time it takes to change threads and match color segments? PE-DESIGN 11 has a Fabric Selector that will automatically adjust the sewing attributes for your embroidery based on your fabric selection. The Intelligent Color Sort function will group stitches that share the same colors so you can reduce the time spent changing threads.

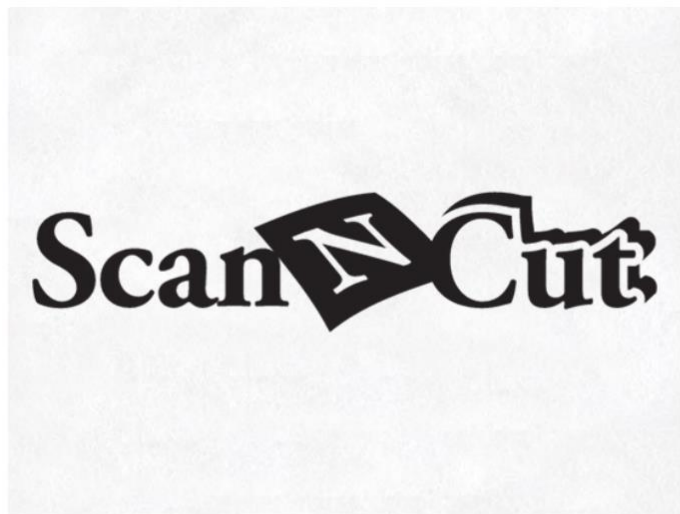

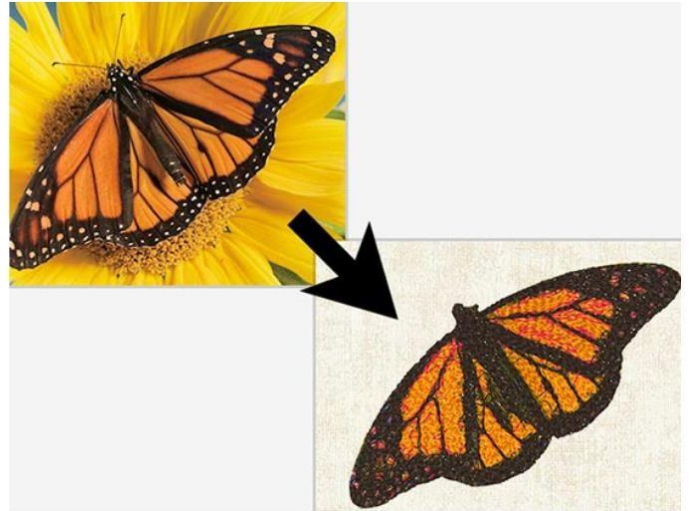

## Flexibility and Movement

Round and Flexible Spiral Stitches add motion and dimension to your embroidery shapes. Stitches can be set to follow the shape of your embroidery, or stand out to give you a three-dimensional effect.

## Transform Photos Into Embroidery with PhotoStitch

Create embroideries from photos with the PhotoStitch feature. Transform your photos into works of art to be framed, put on tote bags, tapestries and so much more. The PhotoStitch, Auto Punch, and Cross Stitch Wizards have enhanced tracing capabilities for a more accurate output.

## ScanNCut Compatible

Import FCM files to create embroidery designs. Create FCM files to send to CanvasWorkspace or directly to a wirelessly enabled ScanNCut Home and Hobby Cutting Machine.

## Exclusive Wireless LAN for Luminaire XP1

Wirelessly transfer embroidery designs and sewing stitches between PE-DESIGN 11 and the Luminaire XP1.\*
